Diving for Treasure / En busca de tesoros (continued)

INTRODUCING THE BOOK

What kind of treasure is usually associated with underwater? How does it come to be on the ocean floor? What has time done to the treasure? Only certain people can dive for treasure. What would you need and need to be able to do?

This discussion will generate some shipwreck-related and treasure-related vocabulary, which either could be checked against the glossary on the inside front cover or could begin a glossary on a chart to be added to during the reading and during the discussion after the reading.

The title page will confirm what kind of treasure might be found in this search.

Page 4: Why might the author have thought it significant to say “after a storm”?

What link would this have with treasure that has been on the seabed for centuries?

The photograph on page 5 does not look like treasure. What might this be or have been?

What is the purpose of page 6?

Which piece of information might you find most helpful?

Page 9: Why was the copper bucket significant?

Page 10: Why would you need a permit to lift treasure from the seabed?

What questions would you ask Peter Leo if you had the opportunity to meet him?

Discuss interviews and how questions should focus on the person’s role and expertise rather than just general or offtopic questions. Also discuss how to avoid questions that provoke a one-word answer, especially a “yes” or “no” response.

What are your unanswered questions about this discovery?

Write these on a sheet of paper and post it somewhere where others can read it. Your friends may be able to help you!

Write a short article for a newspaper telling of the discovery of some treasure. Reread the book to help you with your planning.
